Art Unit: 2832

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 48 and 51 are rejected under 35 U.S.C. 102(b, e or f) as being anticipated by the admitted prior art of Fig. 1 and page 2 (APA). Applicant admits at page 2 that a varistor having a temporary plating resist except at its ends can be formed by dipping into a nickel plating solution at page 2 to form a nickel plating only on the ends -- this meets claims 48 and 51, where Fig. 1 is prior art having the terminals on ends. The body is "untreated" where the resist is removed and it is not seen how removal renders the product distinct.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 49 -50 rejected under 35 U.S.C. 103(a) as being unpatentable over APA in view of Chan '443, Ravindranathan, or Cobb. The claimed invention is disclosed as noted above, except the thickness and tin. Chan '443 discloses a nickel cap at about 1um and a tin cap at col. 9, to create good terminations and to prevent leaching. Cobb and Ravindranathan disclose similar teachings at cols. 2 and 1 respectively, such that it would have been obvious to employ the thickness claimed and tin for the purposes noted.

Art Unit: 2832

5. Applicant's arguments filed 10/31/02 have been fully considered but they are not persuasive. It is not clear how an "untreated" surface is distinct since the APA prior art product has no treated surface at the end of its manufacture, and applicant claims no method nor makes argument regarding any structural difference.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D Easthom whose telephone number is 703 308-3306. The examiner can normally be reached on M-Th from 5:30 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad, can be reached on (703) 308-7619. The fax phone number for the organization where this application or proceeding is assigned is 703 308-7722.
